Grant Application for Friends of Friendship Park

2. Description of Project: We are requesting funding for Mad Science to perform during May Fair on 12 May, which is a family event to raise money for Turtle Park and benefit kids in the community who use the park. Mad Science is an interactive kids show that conducts science experiments in a fun and educational way. The show will teach kids about chemistry, air pressure, vacuums, gravity, Newton's laws, among others and we believe this interactive show will be a great way for kids to get excited about science. The event is on a Saturday and we would like to have Mad Science perform for 45 minutes. Please see Attachment 2 for further information on Mad Science.

Describe the Benefits to the Residents of ANC3E: May Fair will be held at Turtle Park, located between 45th and Van Ness Streets, and hundreds of kids and families in the surrounding neighborhood participate and enjoy this annual event. We believe Mad Science will expose young kids to the learning of science outside of the classroom and be an educational opportunity to get even younger kids—who might not yet have science in their curriculum—excited about science. This event is entirely for kids and families in the neighborhood.

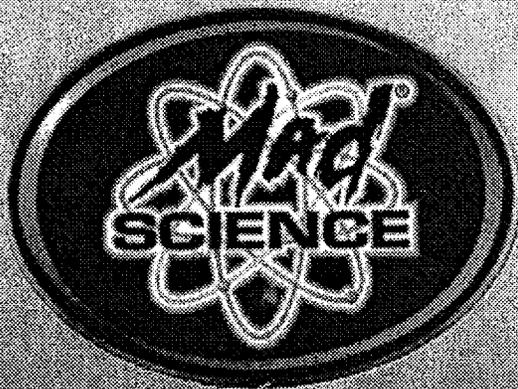

Budget: Rate for a single show is \$415. This grant application requests funding for the total amount: \$415. See Attachment 2, which provides more information on Mad Science and its rates.
