11/29/2017	Application Accepted	SB1800068	4700 WISCONSIN AVE NW, WASHINGTON, DC 20016	One (1) soil boring will be drilled at the above referenced site for our subsurface exploration. The boring will be drilled using 3.25-inch continuous flight augers. The borings will extend to a maximum depth of 40.0 feet below current site grades. The borings will be drilled using a track mounted drill rig. We anticipate that the maximum annular diameter of the holes from the field exploration including the auger flights will be approximately 6-inch. The soil sampling interval will be every 2.5 feet within the upper 10 feet of the boring, followed by every 5 feet to the maximum depth explored. The samples will be containerized in glass jars for geotechnical classification and laboratory testing. Groundwater readings will be obtained during drilling and immediately after drilling. After drilling operation has been completed, the profile boring will be grouted in general accordance with DOEE requirements. Per our discussion with the property owner, they are unaware of any known contamination present at the site.	Construction	Miscellaneous	1733 0021	3E	MU-4	JOHN KENNEY	47TH AVENUE LLC
